Figure 15

Argument	Type	In/Out	Description
StrXML	String	In	XML containing authentication elements.
StrLanguage	String	Out	Name of Language to return messages in (i.e. English). If blank
			then English is assumed.
StrSiteUrl	String	Out	URL of the site this user is trying to logon to (i.e.
			intranet.planetci.com).
strüserName	String	Ont	User Name of the logon. Must match Login.UserName field in the
Action of the second of the se			database to authenticate.
StrPassword	String	Ont	Password of the logon in clear text. The AuthenticateLogin object
			will create an SHA-1 hash of this text and compare it to the
			Login. Password field in the database to authenticate.
StrResult	String	Out	If failure or error, this will contain the user-friendly text to display to
			the end user with the failure or error description.
StrErrorMsg	String	Out	If failure or error, this will contain additional error information. If
			the strOptions /EEXML or /ERXML flags are on, this will be in XML.
StrRootTag String Out	String	Out	Root XML Tag extracted from the document.

Argument	Туре	Type In/Out	Description
strLanguage	String	<u>n</u>	Name of Language to return messages in (i.e. English). If
			blank then English is assumed.
strSiteUrl	String	In	ULR of the site this user is trying to logon to (i.e.
			intranet.planetci.com).
strUserName	String	In	User Name of the logon. Must match Login.UserName field in
			the database to authenticate.
strPassword	String	In	Password of the logon in clear text. The AuthenticateLogin
			object will create an SHA-1 hash of this text and compare it to
			the Login. Password field in the database to authenticate.
Ing Login_ID	Int	Out	If the authentication is successful, this will contain the Primary
			key to the login table for the user.
IngProject_ID	Int	Out	If the authentication is successful, this will contain the Primary
			key to the project table for the strSiteUrI.
LngLanguage_TD	Int	Out	If the authentication is successful, this will contain the Primary
			key to the Language table for the strLanguage.
strfullName	String	Out	First and Last name of the user.
strEmail	String	Out	Email address of the user.
strResult	String	Out	If failure or error, this will contain the user-friendly text to
Trigger of the control of the contro			display to the end user with the failure or error description.
strEntorMsg	String	Out	If failure or error, this will contain additional error information.
			If the strOptions /EEXML or /ERXML flags are on, this will be
			in XML.

Argument	Type	Type In/Out	Description
inglanguage_ID	Int	In	Name of Language to return messages in (i.e. English). If
	***************************************		blank then English is assumed.
IngProject_ID	Int	In	Foreign key for the URL of the site this user is trying to logon
			to (i.e. intranet.planetci.com).
IngLogin_ID	Int	I.	If the authentication is successful, this will contain the Primary
			key to the login table for the user.
strkootTag	String	In	Root tag that must match FNBizTalkSchema.RootTag field.
strkesult	String	Out	If failure or error, this will contain the user-friendly text to
			display to the end user with the failure or error description.
strErrorMsg	String	Out	If failure or error, this will contain additional error information.
			If the strOptions /EEXML or /ERXML flags are on, this will be
The state of the s			in XML.

Argument	Type	In/Out	Description
IngLanguage_ID	Int	In	guage to return messages in ( i. nglish is assumed.
IngProject_ID	Int	In	Foreign key for the URL of the site this user is trying to logon to (i.e. intranet.planetci.com).
IngLegin_ID	Int	In	If the authentication is successful, this will contain the Primary key to the login table for the user.
NdReport	XML DOM	In	XML DOM Object containing the report request.
strResuit	String	Out	If failure or error, this will contain the user-friendly text to display to the end user with the failure or error description.
StrErrorMsg	String	Out	If failure or error, this will contain additional error information. If the strOptions /EEXML or /ERXML flags are on, this will be in XML.
